Education

National Institute of Technology, Mizoram

Bachelor of Technology in Computer Science and Engineering (CGPA: 9.33 / 10.00)

Expected June 2027

Aizawl, Mizoram

- **Relevant Coursework:** Data Structures and Algorithms, Object Oriented Programming, Database Management System, Operating Systems, Computer Network, Artificial Intelligence, Software Engineering

Experience

Machine Learning Intern at Cothon Solutions | [Certificate](#)

December 2024 – January 2025

- Developed a flower image classifier with 85.29% accuracy, a chatbot using NLP, a speech-to-text converter, and a stock price analysis system, applying machine learning techniques to diverse real-world problems.
- Presented project findings to a technical audience, enhancing communication and presentation skills.

Attended Winter School at IIT Guwahati | [Certificate](#)

January 2025

- Worked on practical implementations using frameworks like TensorFlow and PyTorch.
- Explored real-world applications of NLP, including text generation and sentiment analysis.

AI Intern – TechSaksham (Microsoft & SAP CSR Initiative) | [Certificate](#)

Dec 12th 2024 – Jan 12th 2025

- Studied a plant disease detection system, focusing on architecture, evaluation, and computer vision.
- Enhanced problem-solving, critical thinking, and collaboration skills through project-based learning.

Open Source Contributor – GirlScript Summer of Code (GSSoC) | [Certificate](#)

July 2025 – October 2025

- Contributed merged pull requests to open-source repositories including **Advanced-Discord-Bot** where I added a new command and **otloginfrontend**.
- Developed automated Discord bot command to reduce manual server management toil.

Projects

Car Price Prediction using Linear Regression | https://github.com/richaray/CarPrice_Regression

- Built a multivariate linear regression model from scratch.
- Debugged and resolved data processing and model performance issues through systematic testing and analysis.
- Followed open-source practices: code documentation, Git versioning.

TheMoodShelf | www.themoodshelf.com | [www.github.com/richaray/themoodshelf](https://github.com/richaray/themoodshelf)

- Built a full-stack web app for emotion-based book recommendations using NLP and Claude Code.
- Used DistilRoBERTa for mood detection. Explicit negation handling for handling LLM failures (<3s response).
- Implemented recommendations using MiniLM + cosine similarity on 998-book dataset.
- More than 55 tests validating live usage. Deployed on Hugging Face Spaces using docker pipeline.

Data Analysis | <https://github.com/richaray/DataAnalysis>

- Refined and validated a dataset of 1,370 mobile phone entries using Pandas, handling missing values, standardizing formats, and correcting inconsistencies across 18 features.
- Visualized trends and insights using matplotlib and seaborn.

Skills and Competencies

Languages: C++, C, Java, Python, HTML, Javascript, SQL

Libraries/Frameworks: Scikit-learn, TensorFlow, PyTorch, Flask

Tools: Git, GitHub, Jupyter Notebook, PyCharm, MySQL, Linux, Cloud Deployment, HuggingFace, Claude Code

Concepts: Data Structures & Algorithms, SDLC, Agile Development Practices, Machine Learning, System Design Basics.

Soft Skills: Communication, Presentation, Team Collaboration

Achievements

- 3rd position in Yuvamanthan Hackathon 2024 Idea Pitching contest
- Cleared JEE Advanced (2023)
- Completed GeeksforGeeks 160 Days DSA Challenge

Certifications

Coursera (DeepLearning.AI & Stanford University): [Supervised Machine Learning](#), [Advanced Learning Algorithms](#), [Unsupervised Learning & RL](#); **GeeksforGeeks:** [160 Days DSA Challenge](#)

Social Engagements

- **GirlScript Summer of Code 2025 Campus Ambassador:** Earned [Bronze](#) category title – The Explorer CA, NIT Mizoram
- **Walmart Sparkathon Participant:** Submitted [GreenCart](#) ([Certificate](#))
- **Participant:** Represented South Korea at Yuvamanthan Model United Nations (2023); Hackathon Participant (2024)
